

Preschool Assessments

The Brookville Local School District is participating in an effort to identify, locate and evaluate all children from 2-4 years of age who may have delays/disabilities in the following areas: communication, motor skills, adaptive behavior, social emotional functioning, hearing impairment, visual impairment, cognitive ability and/or autism.

Public schools have responded vigorously to federal and state mandates requiring the provision of free appropriate public education regardless of a child's disability. However, before school districts can serve children, they must be identified. Many unidentified children are preschoolers, and parents may not be aware their child has a disability, or that there are programs and services available.

Brookville Local Schools continues to seek the assistance of parents and guardians of children with suspected disabilities who are not presently served. If you have, or know of, a child who may have a disability, please contact the student services department at 833-6419 for more information.
